

Mega Minor Bench Burner

Hotter, Wider Flame!

A Mega-step forward, this new torch is hotter than the Minor, with a larger, wider flame for the same pressure oxygen.

The Mega Minor has great versatility: able to work soft glass, easily going to larger workpieces; and able to dial the flame down for detail and stringer work; and also able to work borosilicate.

The Mega makes better use of oxygen concentrators for hotter and larger flames than ever before!

This torch ROCKS!

Features

- Work Soft Glass, Faster, Larger
- Get more value from oxygen concentrators
- Work Borosilicate on (two) concentrators
- Wider, hotter flame
- Turn flame down for detail and stringer work
- “B” fittings installed as standard
- Optional hose barb fittings also available
- Valves remain cool
- The Mega torch head can also be mounted on top of the Red Max, Midrange Plus and Major burners. Must be ordered as an option.
